

BLÜCHER® Shower

BLÜCHER®

STAINLESS STEEL DRAINAGE SYSTEMS

Grating solutions expressing your style

Giving you the opportunity to blend invention, quality and design into a bathroom that reflects who you are, BLÜCHER® Shower comes in a great number of varieties. BLÜCHER® Shower products are made to enhance your personal style, your feeling of wellness and the ease of maintaining good hygiene in your bathroom. This is why our drains are designed and manufactured in stainless steel. A classic material that stands the aesthetic and functional test of time.

Proper installation keeps up the flow

The BLÜCHER® Shower line of gratings is completely compatible with the BLÜCHER® standard drains that have been effectively draining bathrooms for the past 40 years. Most of the standard BLÜCHER® drains allow adjustments in height, tilt and rotation for a perfect fit in the flooring.

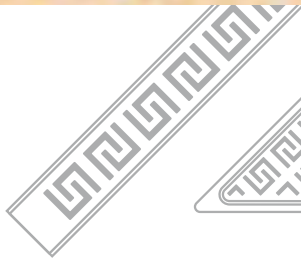

Floor drain installations should always be carried out by an authorized plumber in accordance with local codes and regulations. In order to achieve a perfect result, we recommend that right from the start you inform your bathroom supplier and installation professionals of your expectations as to the final result.

Make sure that the contractor knows where you want the drain to be placed before the piping installation starts. Your plumber provides you with your particular drain of choice, and the tiler lays the tiles in a pattern that compliments the design and shape of your gratings.

ATHENS

ATHENS

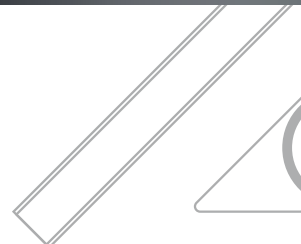

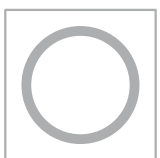

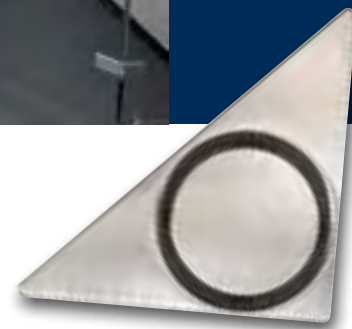

The ATHENS design is all about reflection through one of the classical patterns of great history.

COPENHAGEN

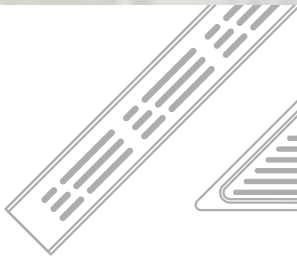

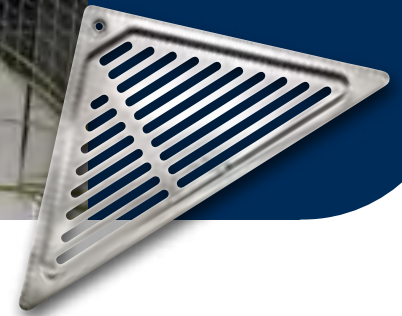

COPENHAGEN

The COPENHAGEN design reflects the height of minimalism and attention to detail.

DETROIT

The tough and “no-nonsense” DETROIT design brings you some of the renown styling of the Motor City.

NEW YORK

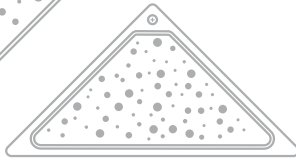

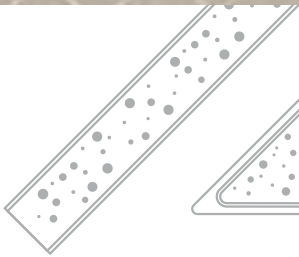

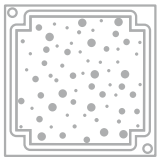

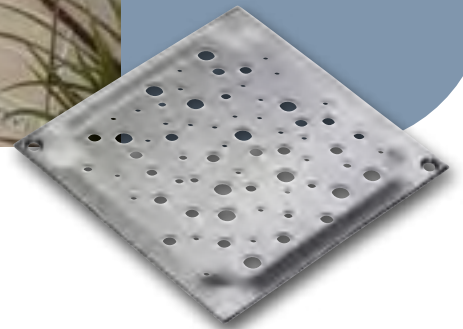

The NEW YORK design highlights conservation, with a twist of big city flair.

OSLO

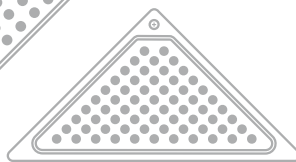

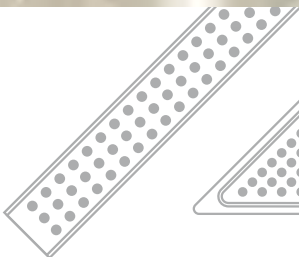

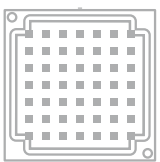

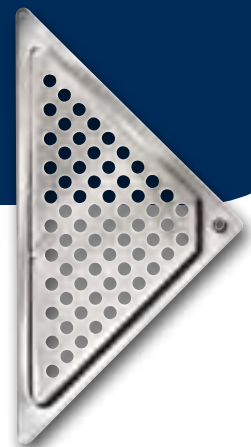

The OSLO design blends the authentic and the contemporary into one. A random pattern of water drops gives you a fresh feeling.

VIENNA

The practical pattern of the VIENNA design emphasizes functionality and keeps you in key with tradition.
