

Finally, valve configuration online!

Dynamic duo simplifies valve specification – increases valve system performance.

Take the work out of valve specification with Powers' new online valve configuration software. Log on today to configure our new HydroGuard® XP master mixing and hi/lo tempering valves – you may win a new GPS unit.

- Easily configure new HydroGuard® XP valve systems
- Quickly go from design to 2D and 3D drawing downloads
- Draft, revise, print, share and securely archive plans
- New valves are ASSE 1017 listed and CSA B125 certified
- Valves regulate outlet temperature at flows down to 1 gpm
- Control at approach temperatures as low as 5°F
