FEATURES AND BENEFITS

- Wide range of models to connect faucets, toilets, refrigerator ice makers, washing machines, dishwashers, water purifiers, widespread connections, old style bath supplies, water heaters, and other related uses.
- PVC connectors feature heavy duty reinforcement which provides excellent strength and long term reliability. Stainless steel braid reinforced connectors are double reinforced through the use of a reinforced inner core thermoplastic hose covered completely with stainless steel wire braid.
- Specially molded sealing washers make leak-free installations quick and easy. All washers snap into place and should not fall out or get lost.
- Hose compounds resist attack from chemicals found in water and provide an increased service life.
- All products are suitable for use with hot or cold potable water because they are intended to comply with IAPMO, NSF 61, and California Prop 65 standards.

INSTALLATION

Brass nuts: Hand tighten plus ¼ turn. Check for leaks. Do not over tighten.
 Plastic nuts: Hand tighten only. Check for leaks. Do not over tighten.

USAGE

These products are for use with water in exposed, accessible locations only. They are not intended for connection from an undersink instant hot water heater to a faucet.

PRODUCT SELECTION

It is the responsibility of the user to determine the suitability of a product for any intended application.

MAINTENANCE

Flexible connectors should be inspected regularly for general fitness and they should be replaced if they show signs of damage, corrosion, or wear, or if they are more than five years old. Do not expose flexible water connectors to corrosive chemicals. Do not store household chemicals in proximity of flexible water heater connectors.

Sizes through 24" are packed straight, 25 pieces per box.

Connectors longer than 24" are coiled and twist tied, then packed 10 pieces per box.

Note: Retail packaging and OEM products available upon request.
